

Companies are required to ensure the safety of their employees at workplace. Having an OHS management system has twin benefits – attracting and retaining good employees as well as able to timely comply to the OHS legal requirements. With growing competition in the National and International markets it has become an important task to meet the challenges in a cost-effective manner. This training course has been designed by APC to equip delegates with the skill to develop, implement and maintain OHS Management System based on ISO 45001:2018, in their company.
