

The expertise of auditor(s) is crucial to the performance of the internal audit process of any Quality management system, leading ultimately to the success of organizations. Use of Qualified Internal Auditors is a mandatory requirement of the ISO 45001:2018 standard. APC conducts a comprehensive two-day training program delivered by faculty with extensive OHS management system background and time-tested auditing skills. This program is designed so that OHS (ISO 45001:2018) internal auditor(s) thoroughly understand their role and acquire the learning needed to perform effective OHS management system audits in their respective organizations
