

The expertise of auditor(s) is crucial to the performance of the internal audit process of any Quality management system, leading ultimately to the success of organizations. Use of Qualified Internal Auditors is a mandatory requirement of the ISO 14001:2015 standard. APC conducts a comprehensive two-day training program delivered by faculty with extensive environment management system background and time-tested auditing skills. This program is designed so that EMS (ISO 14001:2015) internal auditor(s) thoroughly understand their role and acquire the learning needed to perform effective EMS audits in their respective organizations.
