

Companies are required to ensure the safety of their employees at workplace. Having an OHS management system has twin benefits – attracting and retaining good employees as well as able to timely comply to the OHS legal requirements. It is important for everyone in an organization to have an awareness of their OHS issues (hazards) as well as the required controls. This training course has been designed by APC to make delegates aware of the OHS issues related to their industry as well as the requirements of OHS Management System (ISO 45001:2018 standard).
